Crafty Ideas for the summer....

Greetings from AllKraftz!

Summers are a time when most of us don't feel like picking up our needles and hooks for big projects. One is also inclined to craft with lighter, soft fibres like cotton and linen. We bring you a few patterns, some pretty and quick projects to create during the lazy afternoons.

For more crafty inspiration for summers, look up our Pinterest Board on [Summer Crafting](#)

Featured Patterns for Quick Summer Crafting

Bishi is a simple seamless knitted water bottle carrier that is perfectly practical for everyone! Knit in the round from the bottom up, there are two options for finishing the handles; either garter stitch strap or a stocking stitch strap which can be tied and easily shortened or lengthened to suit. The mesh lace is super dooper stretchy and will fit everything from a bottle of mineral water to a nice chunky water bottle. The whole project can be knit in a couple of hours and requires less than a ball of yarn.

Make this beautiful spiral scrubbie in a single colour or many. Use cotton yarn if you intend to use it for yourself, and acrylic yarn if you want to use it in the kitchen for dishes. A very simple and quick pattern, make these as gifts for friends, or make many and stock for guests in the bathroom.

This bright & stripy mobile phone cover is a fun way to protect the screen of your smart phone. Use up all your scraps to create your own rainbow effect or follow the colour scheme given in the pattern, it's up to you!

Featured Summer Yarns

Bella is a 100% natural cotton yarn which is ideal for summer crafting. Available in fourteen pretty shades, this yarn is ideal for making coasters, cellphone pouches, handbags, and dishcloths.

Bodrum combines the softness of unbrushed linen and the strength of polyester. A great blend for Indian summers. Available in eight natural shades, Bodrum makes an excellent choice for creating trendy accessories in summers.
